All MSV Strings	\$35 + HST
Bring your own strings	\$20 + HST
Over Grips	From \$4 + HST
Replacement Grips	From \$12 + HST

Make your favorite racquet feel brand name again. A new grip not only feels better while holding your racquet, it can also help you play better since you don't have to hold your grip too tight while you play. New grips absorb sweat better, so you don't feel like you're holding a fish when you play in 30 degrees weather.

Over Grips	Replacement Grips
<p>Available from \$4 per grip Grip Installation: free with grip purchase. Plenty of colors available</p> <p>A thin overgrip goes over your existing grip and is quick and easy to put on even during changeovers in a match.</p> <p>Overgrips do not have glue to stick to the grip underneath and you'll see the pros sometimes take one off and put another one on during a match</p> <p>If you don't mind your grip just getting a little thicker or you want to change grips often because of sweaty hands, overgrips are what you need.</p>	<p>Available in single grips for \$12+HST per grip Grip Installation: free with grip purchase. Select colors available</p> <p>If your grip is old and falling apart and you want your grip to stay exactly the same thickness, it is better to get a replacement grip. Some replacement grips have contours for added feel or sweat absorption. contours for added feel or sweat absorption.</p> <p>The replacement grip is the original grip that your racquet came with and it goes straight onto the handle of a racquet.</p> <p>Replacement grips are thicker than an overgrip and one side has glue to stick to the racquet itself</p>

Tac Perforated	Perforiert / perforated			0.6mm	White
Prespi Absorb	sandgestrahlt / sandblasted			0.6mm	White, Blue

Restringing

If you don't break strings often, it is recommended that you string your racquet as many times per year as you play per week. Strings lose tension over time and will not feel the same as when your racquet was new or like when you had it restrung. Since our racquets have been collecting dust over the past 6 months it is a good idea to get it restrung and ready for another season. Generally at club level, most racquets now are strung between 52 and 46 lbs. Racquets used to be strung very tight (between 58 lbs and 68 lbs) but with new racquet and string technology, some of the pro's string their racquet as low as 40 lbs. Less tight strings are also a bit easier on the arm but can move more on each other during contact with the ball and because of that friction might break sooner. Power, spin and durability depends on the kind of string, texture and the thickness of the strings.

As a general rule: tighter strings - less power and more control Looser strings - more power and less control

Available Strings

MSV – Spin Plus Tennis String

Precise spin control with added power

Ideal for players looking for an elastic, multifil string with enhance spin potential.

MSV – GO MAX Tennis String 12m Set

Excellent balance between control and power combined with high durability
